Clarification

Cellular Concrete, Item SPV.0035.02

The Special Provision for this item specifies 18-inch lifts and that the concrete be scarified between lifts. The 18-inch lifts are required to reduce lateral pressure on MSE wall panels from wet cellular concrete. It also facilitates placement of MSE wall reinforcement between the lifts. The lift height may only be increased with the approval of the MSE wall designer.

The scarification requirement is not necessary and is waived.

Very truly yours,

Michael Loughran

Coordination Manager
