

Question 1. Will the City provide access to consultants to allow visitation of secured areas of the bridge including the bridge house, machinery area and pier pits and/or to schedule a bridge opening or two for the South 1st Street Bridge prior to submitting the RFP?

Answer:

The prospective consultant can perform a walk through the South 1st Street Bridge over K.K. River by contacting Mr. Craig Liberto, Structural Design Manager at (414)286-3294 or craig.liberto@milwaukee.gov at least two days prior to the scheduled visit. Since the bridge is unmanned and remotely operated from the Kinnickinnic Bascule Bridge, bridge maintenance personnel will meet the consultant on site. Visits can be scheduled any week day between 9:00 AM and 2:30 PM.

Question 2. Having read the RFP I noticed that subsection D of Section VI. "Preparing and Submitting a Proposal" mentions a submittal date of July 7th. I'm sure this is merely a typo but please provide a clarification.

Answer:

The date for submitting a proposal in Subsection D of Section VI should be revised to August 11, 2014.
