Jeffrey S. Polenske
City Engineer

**Official Notice No. 96-2015
Addendum No. 1**

NOTICE TO CONTRACTORS intending to bid on Official Notice No. 96-2015, Project 1, which appeared in the Daily Reporter and on Milwaukee Public Works website on July 16, 2015, with a Bid Opening date of Thursday, July 30, 2015 at 10:30 AM.

This addendum is issued to Notify Contractors that the City of Milwaukee is currently in the process of hiring an Environmental Consultant to perform soil testing and update the status of the contamination levels within the project limits in order to obtain approval for acceptance at a licensed disposal facility.

- Soil testing was conducted and a Phase 2.5 Environmental Report was completed in 2011. The report indicated low levels of DRO's and lead contaminated soils in the upper 5' of the excavated areas.
- In order for a licensed disposal facility to accept any excavated soils, an updated characterization of the soils needs to be obtained for acceptance of excavation spoils.
- The City of Milwaukee is in the process of acquiring an Environmental Consultant who will collect soil samples, provide waste characterizations, and obtain approval from a licensed disposal facility. The proposed environmental testing may not be completed by the time construction is planned to start, at which time the construction schedule and completion date can be adjusted.

Note: The contractor shall acknowledge receipt of Addendum No. 1 on page titled "ACKNOWLEDGEMENT PAGE" of the bid document.

Benjamin Schultz
Project Manager
